PROFESSIONAL PROFILE

Lucinda Ann Lee Rasmussen, Ph.D., LCSW, Professor at the School of Social Work at San Diego State University, has taught social work practice classes for the past 27 years. She has 40 years of clinical and research experience in the field of child sexual abuse, with specific expertise in intervening with young people who problematic and/or sexually abusive behaviors. Dr. Rasmussen's research focuses on risk assessment of youth who are sexually abusive, and effects of trauma, including sexual abuse and domestic violence. She developed the Trauma Outcome Process Assessment (*TOPA*) a practice model for assessing and treating traumatized children, youth and adults and has published several peer reviewed articles on the model in the *Journal of Child Sexual Abuse*, *Journal of Child and Adolescent Trauma*, and *Israel Journal of Psychiatry*. She completed a Sabbatical as a visiting professor at University of Haifa in Israel. She has co-authored peer review articles with L.C. Miccio-Fonseca, Ph.D., author of the *MEGA^f*, a risk assessment tool for youth who engage in coarse sexual improprieties and/or sexually abusive behaviors. These articles discuss application of the *MEGA^f* to specific populations of youth who are sexually abusive: youth with low intellectual functioning and very high risk, dangerous youth (i.e., sexually violent and sexually violent predatory youth).

Dr. Rasmussen is Senior International Research Consultant on the *MEGA^f* International Projects and has assisted in *MEGA^f* specialized training in London, Liverpool, and Manchester, England, Glasgow, Scotland, Dublin, Ireland, Phoenix, Arizona, Indianapolis and South Bend, Indiana, Honolulu, Hawaii, and several locations in California. She is a pioneer in the field, evidenced by completing the first longitudinal predictive validity study on youth in residential care that applied *MEGA^f* and *JSORRAT-II*, the two most contemporary risk assessment tools for youth who are sexually abusive. Her 15-year follow-up of this sample as they transitioned to adulthood is the first study to use a state sex offender registry as a predictive variable for recidivism.

Dr. Rasmussen is a member of the Board of the California Coalition on Sexual Offending (CCOSO) and Editor of the organization's quarterly Newsletter, *Perspectives*. She has been a member of the Planning Committee for the annual Summit on Interpersonal Violence, Abuse, and Trauma Across the Lifespan for the past 21 years, and in 2019 was given the Institute for Violence, Abuse, and Trauma's Volunteer of the Year award.
