

4.0.2 The program provides its most recent year of summary data and outcomes for the assessment of each of the identified competencies, specifying the percentage of students achieving program benchmarks for each program option.

The summary data and outcomes for the students completing the foundation year of the program or the final advanced year of the program in Spring, 2017 are presented in the tables below. The established benchmark is 85% of students would meet a competency. Students met the benchmark on both measures on two competencies, and met the benchmark on an additional four competencies on one measure. They failed to meet the benchmarks on two competencies on both measures (competency 4, research, and competency 5, policy practice). An examination of the table shows about one in five students meet did not perform well on the qualifying examination, and missed the benchmarks on seven competencies in that exam. Students did much better in the Comprehensive Skills Assessment failing to meet the meet the 85% benchmark on just two competencies.

For students in the Advanced Direct Practice concentration, the percentage of students meeting or exceeding the benchmarks improved dramatically. Students met the benchmarks on six competencies on both measures, and on the other three competencies, students met the benchmark on one measure. In other words, Advanced Direct practice students were able to demonstrate competency on EPAS standards on at least one measure.

For students in the Administration / Community development concentration, the percentage of students meeting or exceeding the benchmarks were slightly less favorable. Students met the benchmarks for all competencies on at least one measure. Students met the benchmarks on two competencies on both measures.
